

Phase 3: Development Part 1

In this phase you will begin building your project. Please refer below the requirements technology wise:

AI & ADS:

In these two technology projects you will begin building your project by loading and preprocessing the dataset. Perform different analysis as needed. After performing the relevant activities create a document around it and share the same for assessment.

DAC:

In this technology projects you will begin building your project by loading and preprocessing the dataset. Perform different analysis and visualization using IBM Cognos. After performing the relevant activities create a document around it and share the same for assessment.

IOT:

In this technology project you will begin building your project by deploying IoT devices and then developing a Python script on the IoT devices as per the project requirement. After performing the relevant activities create a document around it and share the same for assessment.

CAD:

In this technology projects you will begin building your project using IBM Cloud Foundry. Perform different functions as per project requirement. After performing the relevant activities create a document around it and share the same for assessment.

NOTE:

File Naming Convention: **TechnologyName_Phase3**

After completion upload your file to your **same private GitHub account** that has been created earlier. Please give access to your **college evaluators email ids**. Also please give access to faculty evaluator[**facultyevaluator@gmail.com**] and industry evaluator [**IndustryEvaluator@skillup.online**] to your private GitHub repository for evaluation process.
